

## Training: Personal security awareness

The risks we face when travelling, at work, or even whilst socializing can vary significantly from one location to another, but are we aware of them, and how the actions we take as an individual can have a direct influence on the outcome? There is no single measure which guarantees personal security all the time but with training and awareness we can help better understand and implement the basics and avoid the pitfalls and mistakes made by others.

### Personal security awareness training

Our **1-day** personal security awareness training includes presentations focusing on key personal security areas and interactive group discussions and exercises where all participants will have the opportunity to conduct personal security management planning within a realistic training scenario.

#### The training package includes:

- ▶ Personal security awareness
- ▶ Pre-deployment and itinerary planning considerations
- ▶ Considerations when conducting journeys by air, road and the use of public transport and taxis
- ▶ Considerations when selecting accommodation and using hotels
- ▶ Managing inappropriate behaviour and harassment
- ▶ Emergency planning, preparation, and incident response

### Who should attend?

Our personal security awareness training is designed for staff, employees or dependants that may be visiting, working, or living in low to medium risk environments. The course is designed to accommodate all levels of experience from those deploying for the first time to experienced individuals who require refresher training.

### Why choose Control Risks?

Our established international presence and unrivalled knowledge of diverse security and operating environments make us a recognised global leader in security, risk and resilience training, with a proven track record for delivering high-quality courses around the world.

We deliver training from facilities in Europe, North America, Latin America, East and West Africa, the Middle East and Central Asia and can conduct training directly at your facilities and project locations.
