IN A CHANGING WORLD WE MAKE THE DIFFERENCE

At Control Risks, we understand risk, cut through uncertainty, and empower our clients to make better decisions. We keep opportunity moving forward and support organisations to benefit the communities and environments they work in. Through insight and experience, we help to mitigate threats, whatever form they take. In times of hope and times of crisis, we stand alongside our clients. When what matters most is on the line, we make the difference.

Control Risks in Saudi Arabia

complex market. The government's economic diversification plan, Vision 2030, has set a path for development that will impact every sector and province. Local and international organisations must navigate a rapidly changing regulatory environment, ambitious growth objectives and workforce diversification amid a turbulent geopolitical background.

Saudi Arabia is a growing, vibrant and Control Risks has been supporting international clients for nearly 50 years and organisations in Saudi Arabia for over two decades. Our network of experts spans 39 offices across the globe and draws on the practical experience of operating in over 170 countries. We work with some of the largest investors and multinationals across the Middle East as well as with some of the most respected companies across the energy, infrastructure, technology and telecommunications sectors.

Control Risks has an office in Riyadh, Saudi Arabia. Our work in Saudi Arabia is supported by our cross-disciplinary teams of experts from other offices across the region. We have recent project experience in all major Gulf economies.

Our Graduate Training Programme

Acknowledging the objectives and pillars of Saudi Arabia's Vison 2030, Control Risks – the global leader in security and risk management – has developed a gold standard training programme for recent graduates of Saudi nationality seeking a security and risk management career in Saudi Arabia.

What's in it for you?

Our graduate programme will equip you with the technical and management skills as well as the professional and academic qualifications to help you stand out as a leader in your field. You will receive in-house training and education and be sponsored to join a professional body that most clearly matches your interests, whether that is risk, business continuity, crisis management or security. You will also gain experience on a range of client focussed projects, from security threat and vulnerability assessment, development of corporate security strategies, through to operational security planning for major built environment and critical infrastructure projects.

Control Risks will be investing in your future. In year two of your placement, you will be sponsored and supported on a two-year executive master's degree in a risk related topic at a leading university. On conclusion of your time on the graduate programme, vou will be a highly effective and qualified risk consultant, with the knowledge and confidence to advise some of the world's leading companies as part of the Control Risks family.
