

## Control Risks ONE On Watch

**The only Global Risk and Operations Centre to integrate with your business and harness the proactive power of Seerist's threat and risk intelligence technology.**

**Control Risks ONE instantly provides you with a daily view of your operating environments, proactive support on security, compliance, risk, and crisis situations, along with access to best-in-class technology to keep you on the front foot.**

**Our world-leading risk management specialists are on call 24/7, providing you with guidance specific to your organisation so that you can act decisively the moment risks arise.**

### **Our approach isn't just cautionary. It's visionary.**

We don't just see the vulnerabilities and risks you may face; we help you seize the opportunities they present when you're on the front-foot. Each day, our Senior Risk Consultants leverage their experience and technology to provide you with proactive alerts, valuable personalised context, and operational recommendations. Because we have the expertise and technology to do just that.

The engine of ONE's threat intelligence technology is Seerist – the only threat and risk monitoring solution that augments Artificial Intelligence with on-the-ground geopolitical risk analysis. Together, you'll have the confidence to make better decisions.

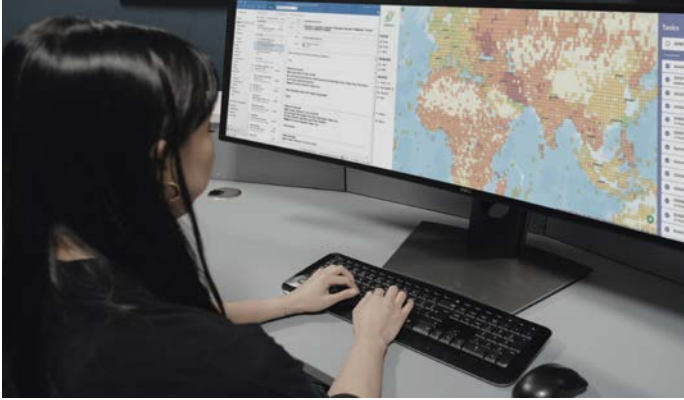

*It's our promise not only to make your organisation safer – but smarter and stronger too.*

### **An extension of you. With expertise unlike anyone else.**

You'll benefit from direct access to our Senior Risk Consultants who scan the world on your behalf, through your business lens, providing a daily view of your risks and proactively contact you should a situation be identified.

#### **Feature highlights include:**

- A Senior Risk Consultant dedicated to your organisation (max seven clients per Consultant)
- A review of your risk register and risk-based onboarding with your risk consultant so we understand your business structure, thresholds, existing ecosystem, and operational footprint to provide you with the best guidance
- Direct access to Seerist technology
- 24/7 hotline to our Global Risk and Operations Centre for crisis/incident management support, operational advice and a plan of action.
- Daily bespoke horizon scans conducted by your dedicated Senior Risk Consultant
- Proactive contact from your risk consultant if your pre-set thresholds are met
- Advice and support from Control Risks specialists in security, risk, and compliance
- Extra support and focus with four Special Watch requests per year (eight hours extra per week for up to three weeks). With the ability to purchase additional credits.

### Dedicated monitoring

Your Control Risks ONE subscription includes access to Seerist, so that alongside our experts, your team can continually assess your risk profile using one of the most advanced tools on the market. We'll work in tandem with you, checking your areas of risk exposure across Seerist and open data sources as part of your onboarding process.

POWERED BY

SEERIST

The only Artificial Intelligence plus human powered solution for threat and risk intelligence professionals

### We've got your back. So you can move forward.

ONE seamlessly integrates with your risk management programme and team, serving as a force multiplier.

#### Personalised Service

It's essential for us to understand your business, operations, culture, and risk profile. We kick off with a thorough onboarding program, which covers your total risk management ecosystem, including your internal incident reporting, escalation processes, risk appetite and thresholds, as well as your locations of exposure and interest. This way we can deliver briefs, assessments, reports, strategies, and scenarios that are bespoke to your organisation.

#### Dedicated Monitoring

Every day, your Senior Risk Consultant harnesses the power of Seerist and other data sources to produce your bespoke Risk Monitoring Report. Armed with the results, and drawing on their extensive knowledge, they'll monitor changes in your operating environments. And should your thresholds be met (or passed), they'll promptly contact you, help to put it into context and define a plan of action with practical operational guidance.

#### Special Watch

We know that occasionally, you may need extra support to monitor a specific trip, event, or situation in a location around the world. Simply activate one of your 'Special Watch Requests' for a set period of time and we'll be your eyes wherever you need some additional focus.

Terms and conditions apply.

#### Week Ahead

We compile a 'Week Ahead' summary just for you. This lists the principal areas of risk that we identify to be relevant to your organisation (based on your Risk Register). These may include trends they're watching (based on shifts in stability levels or emerging hotspot disruptions in Seerist), evolving political situations, or perhaps insights drawn from topical reports produced by Control Risks experts.
