

Control Risks

ONE.

Covering the 2024 National Conventions in Milwaukee and Chicago
Your proactive, prepared and responsive risk management and security partner.

Our Global Risk and Operations Center (G-ROC) makes planning, visiting and working in complex and unfamiliar locations safer. With decades of major events experience (including Olympic Games, Super Bowl and COP28), we are uniquely positioned to drive positive and integrated risk management in the lead up to, during and beyond the Democratic and Republican National Conventions.

How our Global Risk and Operations Center can help you in Milwaukee and Chicago

Surge Capacity

We can provide additional specialist capacity and coverage to your security teams during the Conventions. You're likely to experience an increase in smaller incidents distracting you from the major business issues you're already dealing with.

Always on hand – security monitoring you can trust

Every day, your Senior Risk Consultant will scan for threats emerging around the conventions providing you with a Bespoke Monitoring Report. Should your thresholds be met (or passed) they'll alert you, help you put it into context and define a plan of action with practical operational guidance.

Your consultant will monitor your assets – whether specific active sites (i.e., McCormick Place or Baird Center), targeted events, specific personnel or guest locations throughout the Chicago or Milwaukee areas. We will also track any trending reputational risks for any incident suspected to impact your operations and your assets.

Planned with care - let us deal with the complexities of working and travelling around Chicago and Milwaukee

For the duration of the Conferences, your designated users have direct access to our advice and support on any security situation. We can record incidents, by serving as a midway point of escalation for any incidents requiring further plan of action or deployment of physical support services.

From advice to full resolution

Control Risks ONE goes beyond advice to help you in mobilizing resources on-the-ground or in-house, helping you bring a swift resolution to crises.

Using Seerist to see ahead

Advanced algorithms intelligently identify emerging threats, helping you stay alert and proactive. We access real-time, interactive data on your locations during the Conventions, keeping you informed about developments. Geolocation tracking monitors chatter and breaking news within a 1–25-mile radius of your routes and the venues.

Why Control Risks ONE

Control Risks ONE is the only Global Risk and Operations Center to integrate with your business and harness the proactive power of Seerist's threat and risk intelligence technology.

24/7 hotline to our G-ROC for crisis/incident management support, operational advice and a plan of action
