FOR IMMEDIATE RELEASE

Control Risks Earns Four Competencies from Relativity

Relativity aiR for Review, Financial Services, Cybersecurity and Security Best Practices Competencies Highlight Control Risks' Dedication to Excellence

NEW YORK, Oct. 8, 2025 — Control Risks, a global leader in investigations, litigation support, compliance, cyber incident response, eDiscovery and digital forensics services, today announced it has earned the [Relativity aiR for Review](#) Competency. Through this competency, global legal technology company [Relativity](#) acknowledges that Control Risks has demonstrated proficiency and proven customer success utilizing aiR for Review and has exhibited its knowledge of RelativityOne best practices. The aiR for Review Competency is part of a growing list of achievements earned by Control Risks, including Financial Services, Cybersecurity and Security Best Practices Competencies.

Control Risks' journey with RelativityOne has been shaped by its commitment to solving complex legal and regulatory challenges through technology and deep subject matter expertise. The company has embedded RelativityOne into its global workflows, using it as a foundation for delivering high-impact results across investigations, litigation, compliance and cyber incident response.

Control Risks' investigative expertise has been central to its adoption of aiR for Review. Applying aiR for Review effectively requires both technical and substantive expertise. Rather than simply following direction on prompt development, Control Risks guides clients through the process, drawing on decades of experience in complex investigations. This leadership ensures that AI workflows are not only technically sound but strategically aligned with the nuances of each matter.

"Earning these four competencies from Relativity is a testament to our team's commitment to excellence and our clients' trust. Control Risks has built its reputation on delivering technology-enabled solutions that solve our clients' toughest investigation, litigation, and regulatory challenges. With aiR for Review now part of our competency

suite, we are better equipped than ever to drive efficient, secure and highly defensible outcomes for our clients worldwide," said Michele Wiener, Partner at Control Risks.

Control Risks earned the Financial Services Competency by demonstrating advanced proficiency in using RelativityOne to address multifaceted legal challenges encountered by financial institutions. The Control Risks team enables financial organizations to efficiently respond to litigation and regulatory matters with tailored solutions and services equipped to handle complex data and legal discovery workflows.

To achieve the Cybersecurity Competency, Control Risks showcased its ability to leverage RelativityOne to identify, gather and analyze critical evidence related to cybersecurity incidents and breaches. Its tailored expertise enables organizations to conduct thorough investigations and precise document reviews.

The Security Best Practices Competency recognizes the Control Risks team's security-first mindset when safeguarding enterprise and client data in every phase of engagement with Relativity's solutions. Having a high-level security competency is critical in today's legal technology industry and vital to staying ahead of the competition.

"Our journey with RelativityOne reflects our broader dedication to client needs across industries, from financial services to cybersecurity. Each competency recognizes not just technical proficiency, but an ability to translate that expertise into real results for our clients," said Brad Kolacinski, Partner at Control Risks. "We are grateful to Relativity for their ongoing collaboration and look forward to bringing even greater value and innovation to the organizations we support."
