

## PRESS RELEASE

### Control Risks Expands Global e-Discovery Offering to India

*The specialist risk consultancy brings SaaS solution RelativityOne to clients in India*

MUMBAI, INDIA – 31 May 2024 – Control Risks, the specialist risk consultancy, today announced it is expanding the firm’s global e-discovery offering with the addition of [Relativity](#)’s cloud-based e-discovery solution, [RelativityOne](#), in India. With RelativityOne, Control Risks can better protect its data by storing it in a single, secure SaaS platform that spans the full breadth of e-discovery – from legal hold all the way through to production.

This expansion strengthens Control Risks’ ability to bring advanced e-discovery, analytics, AI and digital forensic solutions to client engagements across Asia, a direct response to increasing demand for digital investigations expertise in India. The [eDiscovery Global Market Report 2024](#) forecasts that the e-discovery market will achieve a value of over \$20 billion by 2028, with the Asia-Pacific region expected to experience the highest growth rate during that period. As data regulations in India continue to evolve amid rapid technological advancement worldwide, having RelativityOne hosted in-country will help ensure compliance with current and future data protection obligations.

With the addition of the cloud solution, Control Risks will be able to further leverage its e-discovery expertise to provide more value and better results for its clients. RelativityOne holds ISO 27001, SOC-2 Type II, HIPAA, and FedRAMP certifications, and is secure from the ground up with proactive threat intelligence and 24/7 monitoring. Additionally, moving to the cloud gives Control Risks the added scalability needed in today’s data-centric society and allows them to build expertise and IP on top of one connected, global solution. RelativityOne also gives Control Risks’ users the flexibility to pick and choose solutions from the [Relativity App Hub](#) that best suits their unique workflows.

“The expansion of Control Risks’ RelativityOne offering, along with our extensive Discovery + Data Insights capabilities in India, aims to meet the increase in demand for e-discovery services in the market,” said Amit Narayan, Partner at Control Risks. “In-house and external counsel based in India are sophisticated e-discovery and analytics clients who require access to cutting-edge technology. As a Relativity Certified Gold Partner, Control Risks is adding RelativityOne expertise to our comprehensive team of on-the-ground investigations experts. We are excited to better support our clients by hosting and analysing complex e-discovery assignments within India, while remaining fully compliant with cross-border data protection requirements.”

"We look forward to further supporting Control Risks' team in solving unique data challenges in India and across the globe," said Laurie Usewicz, Chief Partner Officer at Relativity. "As a Relativity partner since 2013, Control Risks has a long history of expertise using our technology to analyse massive amounts of information for investigations. We're thrilled Control Risks is continuing to scale so clients all over the world can benefit from their in-depth knowledge and unlock the full potential of RelativityOne."

### **About Control Risks**

Control Risks is a global specialist risk consultancy that helps create secure, compliant and resilient organisations, providing the insight and intelligence to realise opportunities and grow. A Relativity Gold Certified Partner, the company provides RelativityOne in the United States, Brazil, United Kingdom, Germany, South Africa, United Arab Emirates, India, and Singapore. Control Risks also offers Relativity Server in Shanghai, China. Control Risks provides global reach with state-of-the-art infrastructure, best-in-class tools, and deep e-discovery expertise and experience, and a broad range of specialized services to help counsel solve the challenges and crises that may arise when organizations seek and convert risk into opportunity.
